DETAILED ACTION

Status of Application, Amendments, and/or Claims

The preliminary amendment received 24 June 2004 has been entered in full. Claims 4, 6, 9-11, 15, 17, 20-22, 24, 25, 27, 29, 30, 37, and 40-51 have been cancelled by Applicant. Claims 1-3, 5, 7-8, 12-14, 16, 18-19, 23, 26, 28, 31-34, 36, and 38-39 are currently pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 5, 7-8, 12-14, 16, and 18-19, drawn to a method for diagnosing and/or determining onset, progression, or regression of a disorder associated with altered β -secretase and/or γ -secretase processing of substrates in a subject, classified for example in class 435, subclass 4.
- II. Claims 23, 26, 28, and 31, drawn to a method for identifying compounds that modulate caspase activation-induced stabilization of a secretase pathway associated protein, classified for example in class 435, subclass 7.1.
- III. Claims 32-34, 36, and 38-39, drawn to a method for treating or preventing a disorder associated with altered β -secretase and/or γ -secretase processing of substrates, classified for example in class 514, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are directed to related methods. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, the method of Invention I involves diagnosis of a disorder or its onset, progression, or regression, whereas the method of Invention II involves screening for compounds that modulate the activity of a protein, and the method of Invention III involves treatment of subjects, wherein each method is not required by any other method.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
